Bullion and Gifting Ecommerce Platform — Screen and Component Specification

Each screen is decomposed as Screen → component/widget → fields or content...

Market research and MVP decision

- Competitor patterns observed
  - MMTC-PAMP: direct bullion benchmark
    - Live prices and product-specific weights/purity
    - Search and filters for metal, product type, price and weight
    - Delivery estimate and PIN-code checks
    - Purity, certification, QR verification and brand credibility
    - Gifting-led coin and bar assortment
  - Tanishq: branded gifting benchmark
    - Gold and silver coins with weight and price filters
    - Occasion-led collections and recognizable brand trust
    - Product discovery by weight, karatage, metal and collection
  - Augmont: broader gold ecosystem benchmark
    - Physical coins and jewellery alongside digital gold/silver
    - Buyback and investment-adjacent services increase complexity
  - Research sources
    - MMTC-PAMP shop: https://www.mmtcpamp.com/shop
    - Tanishq gold coins: https://www.tanishq.co.in/shop/gold-coin
    - Augmont shop: https://augmont.com/shop
    - SEBI caution on digital gold, 8 November 2025: https://www.sebi.gov.in/media-and-notifications/press-releases/nov-2025/caution-to-public-regarding-dealing-in-digital-gold-_97676.html
    - BIS hallmarking overview: https://www.bis.gov.in/hallmarking-overview/
    - CBIC GST invoice rules: https://cbic-gst.gov.in/gst-invoice-rules.html
- Market implications
  - Compete on trust and execution, not catalogue breadth
    - Make purity, weight, price breakup, rate timestamp, delivery terms and returns easy to understand
    - Show authentic product photography and available certificates for each eligible SKU
    - Start with a curated range; do not build every category and automation before demand is proven
  - Initial customer hypotheses
    - Individual buyers seeking trusted gold or silver coins/bars for saving or gifting
    - Festival and occasion buyers who value packaging and delivery confidence
    - Corporate gifting buyers who need a credible catalogue, budget guidance and a quote
  - Proposed first assortment — hypothesis to validate
    - Small curated range of gold coins/bars across a few common weights
    - Small curated range of silver coins/bars and gifting-ready items
    - Rudraksh, coloured stones and gemstones: limited test collection only after supplier quality and certificate processes are clear
    - Corporate gifting: enquiry-led pilot with manual quote and fulfilment
- MVP recommendation
  - Launch first: physical-product commerce
    - Catalogue, product detail, transparent price/tax breakup, stock, checkout, payment, invoice and insured tracked delivery
    - Live metal rate and a controlled price-lock/reprice process for bullion
    - Basic admin product, pricing, inventory, order, payment, refund, shipment and support operations
    - Customer contact, transactional messages, policies and consent records
  - Keep manual where possible
    - Corporate quotes and approvals
    - Product uploads and catalogue merchandising
    - Customer support, returns review and exception handling
    - Basic reports exported from orders and payments
  - Defer until demand is proven
    - Gold Vault digital buy/hold/sell
    - Loyalty, wallet, referrals, gift cards and advanced promotions
    - AI insights, recommendations and marketing automation
    - Full personalization production workflow and automated split delivery
- Validation scorecard
  - Commercial signals
    - Qualified product-page visits and add-to-cart rate
    - Checkout completion and paid conversion
    - Average order value and product/category mix
    - Gross margin after payment, packaging, insurance, shipping and returns
    - Customer acquisition cost by channel and repeat purchase intent
  - Operational signals
    - Rate mismatch and price-lock expiry incidents
    - Payment failures, refunds and reconciliation exceptions
    - Dispatch SLA, delivery success and damage/loss rate
    - Support contacts per order and return/cancellation reasons
  - Decision gate
    - Expand only when contribution margin, fulfilment reliability and conversion are acceptable
    - Validate willingness to buy before investing in Gold Vault, broad catalogue automation or AI features
- Priority colour legend
  - Green — MVP required
    - Needed to launch and safely test physical-product demand
      - Add in store pickup
  - Amber — validate next
    - Useful if customer behaviour or early operating load justifies it
  - Grey — later phase
    - Defer until product-market evidence or compliance readiness supports it

Website screens

- Homepage
  - Header and navigation
    - Logo and primary navigation: Bullion, Gold Coins/Bars, Silver Coins/Bars, Gems and Coloured Stones, Rudraksh, Gifts, Corporate Gifting, Gold Vault
    - Search: keyword input, autocomplete suggestions, recent searches
    - Customer controls: login/profile, wishlist, cart count, language, support
    - Rules: show only published categories; cart count reflects active cart
  - Hero banner
    - Content: headline, supporting copy, desktop/mobile image, CTA label, CTA destination, schedule, active status
    - Actions: shop now, explore collection, request corporate quote
    - Rules: hide expired banners; validate CTA destination
  - Category tiles
    - Content: category name, image/icon, destination URL, display order, active status
    - Categories: gold coins/bars, silver coins/bars, gems/stones, rudraksh, gifts, corporate gifting
    - Actions: open category listing
  - Live metal-rate strip
    - Fields: gold rate, silver rate, reference market/city, purity/unit, currency, last refreshed timestamp, feed status
    - Actions: view rate details, browse bullion
    - Rules: show timestamp; flag stale feed; never present stale rates as live
  - Featured and bestseller products
    - Product card fields: image, name, SKU, current price, purity/weight where relevant, offer badge, stock status, rating, wishlist control
    - Actions: quick view, product detail, wishlist, add to cart when eligible
    - Rules: active in-stock SKUs only unless backorder is explicitly enabled
  - Festival and curated collections
    - Fields: collection name, occasion, banner, mapped SKUs, start/end dates, display order
    - Actions: explore collection, shop products
    - Rules: hide expired collections and unavailable products
  - Offers carousel
    - Fields: offer title, coupon, eligibility summary, start/end date, terms link
    - Actions: view offer, copy/apply coupon
    - Rules: show active offers only; clearly disclose exclusions
  - Corporate gifting entry
    - Content: corporate value proposition, curated kits, quantity/budget prompts, branding and split-delivery benefits
    - Fields: CTA, minimum quantity if configured, enquiry destination
    - Actions: request a quote, explore gift kits
  - Gold Vault entry ③
  - Trust and education
    - Content: purity and hallmark explanation, HUID/certificates, secure insured shipping, invoice and support links
    - Fields: trust badge, explanatory copy, destination URL, evidence/source reference
    - Rules: claims must match product and compliance records
  - Recommendations and recently viewed ③
  - Testimonials and footer
    - Testimonial fields: quote, customer display name/permission, product, approval status
    - Footer content: contact, policies, FAQs, shipping/returns, privacy, terms, social links, newsletter consent
    - Rules: only approved testimonials; record marketing consent separately
- Product listing and search
  - Search and result summary
    - Fields: keyword, autocomplete, result count, category, no-results state
    - Actions: search, clear query, browse suggested categories
  - Filter panel
    - Fields: price range, metal, purity, weight, stone type, rudraksh mukhi, origin, occasion, availability, rating, personalization, offer, delivery PIN code
    - Actions: apply, clear, remove individual filter
    - Rules: filters return active/visible products; bullion prices use latest valid calculated price
  - Sort and product grid
    - Sort: relevance, price low/high, newest, popularity, rating
    - Card fields: image, name, SKU, price, old price if valid, discount badge, purity, weight, availability, rating
    - Actions: detail, quick view, wishlist, compare, add to cart where allowed
  - Delivery checker
    - Fields: PIN code, serviceability result, estimated delivery date, shipping restriction
    - Rules: use current serviceability response; do not promise an unsupported ETA
- Product detail page
  - Media gallery
    - Fields: image set, video where available, alt text, sequence, zoom
    - Actions: view image/video, zoom
  - Product identity and specifications
    - Fields: product name, SKU, category, description, dimensions, weight/unit, metal, purity/fineness, stone type/origin, rudraksh mukhi, care instructions
    - Rules: show category-specific attributes only
  - Price and price breakup
    - Fields: current price, live metal rate, purity conversion, weight, markup/premium, making charge, packaging/insurance where applicable, GST, total, last refresh time
    - Actions: view breakup, refresh rate
    - Rules: price must match pricing engine; show timestamp and applicable taxes/charges
  - Authenticity and certificates
    - Fields: hallmark status, HUID, BIS reference where applicable, certificate type/number, issuer/assaying centre, certificate image/PDF
    - Actions: view/download certificate
    - Rules: show only verified and applicable claims
  - Availability and delivery
    - Fields: stock status, quantity, PIN code, serviceability, ETA, shipping/insurance message
    - Actions: check PIN, select quantity
  - Personalization widget
    - Fields: eligibility, engraving text, recipient name, gift message, occasion, packaging, personalization charge, lead time, preview
    - Rules: enforce character/language limits and show changed cancellation/return rules
  - Offers, reviews and related items
    - Fields: eligible offers, coupon terms, rating, review text/media, FAQs, related SKU list
    - Actions: apply offer, ask question, share, wishlist, compare
  - Purchase actions
    - Actions: add to cart, buy now
    - Rules: disable purchase when unavailable; validate quantity, price and eligibility
- Live pricing and price lock
  - Rate display
    - Fields: metal, purity, rate/unit, reference market, source, timestamp, stale status
  - Checkout lock
    - Fields: locked rate, locked price, lock start/end, countdown, order/cart reference
    - Actions: lock price, refresh/recalculate, continue payment
    - Rules: expired lock forces repricing and renewed customer confirmation
- Login, registration and profile
  - Registration and login
    - Fields: mobile/email, OTP, full name, password where applicable, consent preferences
    - Actions: request OTP, verify, resend, login, logout
    - Rules: validate contact; rate-limit OTP; record consent and security events
  - Profile and address book
    - Fields: name, mobile, email, date of birth, anniversary, billing/shipping addresses, PIN, GSTIN, PAN/KYC status, preferences
    - Actions: edit profile, add/edit address, verify sensitive changes
    - Rules: validate supplied tax IDs; protect sensitive fields
  - Account history
    - Components: orders, invoices, certificates, wishlist, saved items, loyalty, wallet, referrals, Gold Vault holdings, support tickets
    - Fields: order/transaction IDs, status, date, amount, document links, reward balances
    - Rules: documents and records must belong to authenticated customer
- Cart and saved items
  - Cart line items
    - Fields: SKU, product, variant, quantity, current/locked price, personalization, stock status
    - Actions: change quantity, remove, save for later
  - Cost summary
    - Fields: subtotal, discount, coupon, GST, shipping, insurance, packaging, total payable
    - Actions: apply/remove coupon, view terms, proceed to checkout
    - Rules: refresh bullion pricing unless a valid lock exists; enforce stock and offer eligibility
- Checkout — physical products
  - Customer and address
    - Fields: login/guest status, contact, billing/shipping address, PIN, GSTIN, delivery instructions
    - Actions: select/add address, validate serviceability
  - Order review and compliance
    - Fields: products, quantities, locked rate/timer, tax breakup, coupon, gift message, PAN/KYC trigger, terms acceptance
    - Actions: confirm order details, accept applicable terms
    - Rules: complete address and serviceability required before payment
  - Payment selection
    - Fields: gateway, UPI, cards, net banking, wallet, EMI/BNPL if enabled, payable amount
    - Actions: pay, retry failed payment
    - Rules: expired price lock blocks payment; confirm through gateway webhook
- Payment, invoice and confirmation
  - Payment status
    - Fields: transaction ID, gateway reference, status, amount, timestamp, retry link
    - Rules: idempotent webhook processing; order confirmed only after verified success or approved offline payment
  - Invoice and receipt
    - Fields: invoice number, order ID, customer/GSTIN, addresses, product/HSN, taxable value, CGST/SGST/IGST, total, payment reference, PDF reference, email status, IRN/QR where applicable
    - Actions: download invoice, resend email
    - Rules: immutable PDF; correct via credit/debit note; retry failed email/storage
  - Confirmation page
    - Fields: order ID, payment status, delivery address, order summary, invoice status, next steps
    - Actions: view order, track order, continue shopping
- Shipping, tracking and delivery
  - Tracking page
    - Fields: courier, tracking ID, shipment status, ETA, insured status, package value, recipient/address summary, proof of delivery
    - Actions: track shipment, contact support
    - Rules: restrict sensitive logistics details; lock address edits after dispatch
  - Delivery exceptions
    - Fields: failure reason, latest event, support ticket, next action, revised ETA
    - Actions: raise issue, reschedule where supported
- Corporate gifting website journey
  - Corporate landing and enquiry form
    - Fields: company, contact person, mobile/email, GSTIN if available, occasion, quantity, budget per recipient, product preferences, branding, delivery schedule, recipient count, remarks, lead source
    - Actions: submit enquiry, upload logo/brief
    - Rules: company/contact, quantity and budget required; validate file type/size; send acknowledgement
  - Quote review and approval
    - Fields: quote ID, curated products, unit price, customization, shipping, taxes, total, margin-approved status, expiry, payment terms
    - Actions: accept quote, request revision, approve branding proof
  - Recipient and delivery details
    - Fields: recipient name, phone/email where needed, address/PIN, gift variant/message, delivery date, shipment grouping
    - Rules: validate addresses; support split delivery and privacy controls
- Personalization order journey
  - Personalization setup
    - Fields: eligible SKU, engraving text, recipient, message, language, symbols, packaging, preview, charge, production lead time
    - Actions: preview, confirm customization
  - Production and delivery status
    - Fields: production stage, artwork approval, quality check, packaging, dispatch and tracking
    - Rules: disclose non-returnable/restricted cancellation terms before payment
- Loyalty, referrals and offers ⑨
- Support, returns and cancellation
  - Support request form
    - Fields: ticket ID, order ID, issue type, message, attachments, contact channel
    - Actions: submit, add evidence, view status
  - Eligibility and resolution
    - Fields: return/cancellation window, product type, reason, approval, pickup, refund/replacement, SLA, resolution notes
    - Rules: bullion/customized/corporate policies vary; verify order ownership; refund tied to payment
  - Help and policy content
    - Fields: policy version, FAQ, expected resolution time, escalation contact
- Content, SEO and education
  - Content page template
    - Fields: title, slug, meta title, meta description, body, FAQ, related products, images, publish status
    - Content types: buying guides, purity, hallmarking, gemstone certificates, rudraksh guidance, gifting guides, FAQs, policies, blogs, festival collections
    - Rules: unique URLs; claims match backend; version policy pages
- Gold Vault customer journey — MVP ⑯

Integrations and governance

- Shared data and pricing rules
  - Product master: unique SKU, attributes, HSN/GST, weight/purity, media, SEO, certificates and visibility
  - Pricing ledger: source/timestamp, purity conversion, markup/premium, charges, GST, lock, overrides and approvals
  - Order ledger: order, payment webhook, locked price, stock reservation, invoice, shipment, refund and messages linked by IDs
- Communication event framework
  - Channels: email, SMS, WhatsApp, push and in-app
  - Template fields: event, template/version, language, tokens, consent, priority/fallback, retry, delivery status and failure reason
  - Transactional events: OTP, account, payment, invoice, order, shipment, support, return and refund
  - Marketing events: cart recovery, price alert, festival, birthday/anniversary, loyalty and win-back
  - Rules: consent/opt-out for marketing; log timestamp, channel, template version, retries and delivery
- Legal and release gates
  - Gold Vault positioning: gold purchase/holding service; no guaranteed return, deposit, ETF, SGB or derivative claims
  - Disclosures: separate buy/sell rates, spread, GST, custody, vault partner, purity, insurance, risks, settlement, complaints and redemption policy
  - KYC/AML, limits, suspicious activity and bank verification must follow legal/payment-partner advice
  - Confirm Indian GST/tax treatment and legal wording with qualified counsel before launch
  - Require 100% physical backing, independent audit, insurance, custody evidence and daily reconciliation before Gold Vault activation
  - MVP Gold Vault: digital buy/hold/sell only; physical/jewellery redemption is Phase 2
  - Release tests: pricing/stale feed/lock expiry; catalog/certificates/tax; payment webhook/refund reconciliation; shipping/insurance/split delivery; invoice archive/email retry; consent/frequency caps; Gold Vault KYC/backing/reconciliation

End-to-end workflows

- Physical product purchase
  - Browse → listing → product detail → PIN check → personalize if eligible → cart → bullion price lock → checkout/KYC → payment → order confirmation → invoice PDF/email → stock allocation → pick/pack/insurance → dispatch → tracking → delivery → review/support
  - Exceptions: failed payment, expired lock, stock conflict, KYC hold, invoice failure, courier/insurance failure, failed delivery
- Corporate gifting order
  - Enquiry → qualify budget/quantity/occasion → curate products → quote and margin approval → branding proof → recipient upload/validation → payment terms → bulk order/invoice → production/QA → split dispatch → delivery report → campaign ROI and renewal
- Personalization order
  - Eligibility → enter text/message → preview → accept production/return terms → pay → production queue → artwork/engraving check → QA → gift packing → dispatch → recipient updates
- Gold Vault buy/hold/sell ③
- Returns and support
  - Ticket → verify customer/order/payment → evaluate product-specific policy → approve/reject → pickup/replacement/refund → credit/debit note if needed → notify customer → close and capture feedback

Admin screens

- Admin login and password recovery
  - Login form
    - Fields: username/email, password, remember device, risk-triggered CAPTCHA, MFA OTP
    - Actions: login, show/hide password, forgot password, resend OTP, contact administrator
    - Rules: rate-limit attempts; restrict inactive users; record login/security events
  - Password reset
    - Fields: registered email/mobile, OTP/reset link, new password, confirmation
    - Rules: token expiry, password strength/history and match; revoke sessions after reset
  - Security events
    - Events: successful/failed login, suspicious device, password reset/change, MFA challenge, lockout, timeout
    - Communications: reset link/OTP and suspicious-login alert
- Admin dashboard
  - Global filters and controls
    - Fields: date range, warehouse, category, sales channel, payment status, order status, customer segment, campaign, corporate account, Gold Vault transaction type
    - Actions: refresh, export, drill down, assign exception, approve task, view audit trail
    - Rules: date range required; role-based visibility; show data-sync warnings
  - Revenue and margin widgets
    - Metrics: total revenue, bullion revenue, non-bullion revenue, gross margin, average order value, period comparison
    - Includes: date range, currency, source status, drill-down to orders and reports
  - Orders widget
    - Metrics: orders today, total orders, pending confirmation, cancelled orders, order status counts
    - Includes: status, date, product type, owner, link to filtered order list
  - Payments and refunds widget
    - Metrics: failed payments, payment mismatch, pending refunds, refund status
    - Includes: gateway, transaction reference, amount, age, exception link
  - Live metal rates widget
    - Metrics: gold rate, silver rate, rate movement, last refresh, provider status
    - Actions: open pricing screen, inspect rate log
    - Rules: stale-rate alert; abnormal movement alert
  - Inventory widget
    - Metrics: inventory value, low-stock SKUs, reserved stock, damaged stock, stockout risk
    - Includes: SKU, warehouse, available/reserved quantity, reorder level
  - Marketing widget ②
  - Corporate gifting widget ②
  - Gold Vault widget ②
  - Support and approval widgets
    - Metrics: open tickets, SLA breaches, pending approvals, high-value refunds, pricing overrides
    - Includes: priority, age, assigned owner, approval limit, escalation action
  - AI insights and system health ②
  - Dashboard data integrity
    - Rules: figures reconcile to order/payment state; unauthorized widgets hidden; negative values require valid return/refund context
- Admin navigation and settings
  - Main navigation
    - Modules: Dashboard, Catalog, Pricing, Inventory, Orders, Payments/Refunds, Fulfillment, Gold Vault, CRM, Corporate Gifting, Offers, Recommendations, Marketing, Loyalty/Wallet, Compliance, Invoices/Tax, Reports, AI Insights, Support, Integrations, Roles, Audit Logs, Settings
  - Settings screens
    - Fields: store settings, tax settings, payment settings, shipping settings, communication templates, approval workflows, password policy, API keys, data retention, legal policies
    - Rules: restrict configuration by role; audit sensitive changes
- Product catalog administration
  - Product list
    - Fields: SKU, product name, category, metal, purity, weight, stock, calculated MRP, status, visibility, approval state, updated date
    - Actions: search, filter, add, edit, duplicate, archive, bulk select
  - Product editor — core details
    - Fields: name, product type, category/subcategory, SKU, unit, dimensions, origin, stone type, rudraksh mukhi, tags, descriptions
  - Product editor — pricing and tax
    - Fields: HSN, GST rate, live-rate flag, metal, purity, weight, markup percentage, premium/making percentage, fixed charges, calculated MRP
    - Rules: unique SKU; bullion requires metal/purity/weight/rule; positive weight; tax and price logic required
  - Product editor — compliance and media
    - Fields: images, video, certificate upload, hallmark/HUID, certificate status, SEO title/description, visibility, featured flag
    - Rules: active product requires image and valid selling-price logic; certified item requires certificate as configured
  - Product approval and publishing
    - Flow: draft → validate → preview → submit approval → approve/reject → publish
    - Fields: submitter, reviewer, reason, approval status, timestamp, before/after values
  - Bulk upload and update
    - Fields: batch ID, CSV/XLSX file, selected SKUs/category, update type, validation errors, impact preview, approver, publish status
    - Flow: select → upload/edit → validate → preview → approve → publish → audit
    - Rules: preserve before/after history; high-value price changes require approval
- Live rates and pricing administration
  - Provider setup and rate monitor
    - Fields: provider, metal, purity, base rate, reference market/city, unit conversion, refresh interval, last refresh, provider health, fallback source
    - Actions: test connection, refresh, switch fallback, inspect logs
  - Pricing rules
    - Fields: category/product markup percentage, premium type/value, making charge, packaging, insurance, GST, effective dates
    - Rules: formula and tax base must be confirmed with finance; preview before publish
  - Price lock configuration
    - Fields: duration, lock start/end, eligible products, expiry behaviour
    - Rules: duration greater than zero; expired lock requires recalculation
  - Manual override and bulk publish
    - Fields: override flag, reason, requested value, approver, batch ID, affected SKU count, before/after price
    - Actions: simulate, submit approval, publish, roll back where supported
    - Rules: reason and approver mandatory; audit every change
  - Rate audit and alerts
    - Fields: timestamp, source, old/new rate, movement percentage, stale status, alert status, resolution
    - Events: feed failure, stale rate, abnormal movement, failed bulk publish
- Inventory and stock control
  - Inventory overview
    - Fields: SKU, warehouse, available, reserved, sold, damaged, reorder level, procurement cost, status
    - Actions: receive, transfer, reserve, release, adjust, mark damaged
  - Serialized and batch inventory
    - Fields: batch number, serial number, HUID/certificate number, unit identifier, location
    - Rules: unique serial per unit; no negative stock; reserved stock expires with cart/payment timeout
  - Stock adjustment approval
    - Fields: reason, quantity delta, evidence, requester, approver, audit record
    - Rules: high-value adjustments require maker-checker
- Orders administration
  - Order list and queues
    - Queues: all, pending confirmation, payment failed, customized, high-value, cancellation/return, refund queue, exceptions
    - Fields: order ID, customer, amount, product type, payment, invoice, fulfillment, delivery, risk flag, date, owner
  - Order detail
    - Fields: customer profile, line items, locked rate/expiry, price breakup, payment reference, billing/shipping address, PAN/KYC flag, personalization, courier, tracking, notes
    - Actions: verify, assign, hold, cancel where eligible, refund request, open shipment
  - Order processing workflow
    - Steps: verify payment → generate invoice → reserve stock → pick/pack checklist → allocate courier/insurance → dispatch → track → deliver → close
    - Rules: stop on payment mismatch, expired lock, missing KYC, invoice/PDF failure, stock failure or insurance mismatch
- Payments, refunds and reconciliation
  - Payment transactions
    - Fields: transaction ID, order ID, gateway, method, amount, status, webhook status, settlement reference, timestamps
    - Actions: inspect, retry supported operation, reconcile
  - Refund queue
    - Fields: order/payment ID, paid amount, requested refund, reason, eligibility, approver, gateway status, settlement status
    - Rules: refund cannot exceed paid amount; high-value refunds require maker-checker
  - Financial reconciliation
    - Includes: gateway transactions, orders, invoices, refunds, settlements, Gold Vault entries
    - Fields: expected amount, actual amount, variance, status, owner, resolution note
- Fulfillment and shipping administration
  - Shipping rules
    - Fields: serviceable PIN code, courier, method, declared value, insurance required, packaging, pickup location, COD eligibility
    - Actions: configure, test serviceability, assign courier
  - Shipment operations
    - Fields: order ID, courier, tracking ID, ETA, shipment status, package value, insurance status, proof of delivery, failure reason
    - Actions: print checklist, dispatch, track, resolve exception
    - Rules: high-value bullion insured; declared value matches invoice; COD disabled unless approved
  - Corporate split delivery
    - Fields: recipient list, delivery address/PIN, package allocation, dispatch group, tracking, delivery outcome
    - Rules: validate recipient addresses before dispatch
- Compliance and certificates administration
  - Compliance record
    - Fields: BIS registration reference, hallmark status, HUID, purity grade, assaying centre, certificate number/file, GSTIN, PAN/KYC flag, notes
    - Actions: upload, verify, approve, renew/expire, publish customer copy
    - Rules: authorized roles only; require applicable hallmark/HUID and certificates
  - Compliance review queue
    - Fields: record/SKU, missing data, risk level, reviewer, decision, timestamp, audit history
- Invoice and tax document administration
  - Invoice generation
    - Fields: invoice number, order, customer/GSTIN, addresses, HSN, taxable value, tax rates/amounts, discount, shipping, insurance, total, payment reference
    - Actions: generate PDF, store copy, email, retry, download
    - Rules: after verified payment/approved offline payment; totals reconcile to paid amount
  - Credit/debit notes and e-invoice
    - Fields: original invoice, adjustment reason, taxable adjustment, tax adjustment, IRN/QR where applicable, status
    - Rules: invoice immutable; corrections through credit/debit note; e-invoice only where legally applicable
- Customer CRM and support administration
  - Customer list and profile
    - Fields: customer ID, name, mobile/email, addresses, GSTIN/PAN, KYC, orders, lifetime value, preferences, loyalty, referrals, Gold Vault balance, consent, tickets, risk flags
    - Actions: search, review duplicate, view timeline, segment, update permitted fields
    - Rules: validate contacts/IDs; flag duplicates; mask sensitive data by role
  - Customer consent and segmentation
    - Fields: channel consent, purpose, timestamp, source, segment criteria, membership status
    - Rules: marketing only to opted-in customers; honour opt-out
  - Support ticket queue
    - Fields: ticket ID, order ID, issue, priority, SLA, assignee, message, attachments, resolution, refund/replacement action, status
    - Actions: assign, request evidence, resolve, escalate, close
    - Rules: verify identity/order ownership; flag SLA breach
- Corporate gifting administration
  - Enquiry and qualification
    - Fields: company, contact, source, occasion, budget, quantity, product preferences, timeline, owner, lead stage
    - Actions: qualify, assign, schedule consultation
  - Quote builder
    - Fields: quote ID, products/kits, quantities, unit prices, customization, packaging, shipping, tax, total, margin, expiry, payment terms
    - Actions: generate, revise, submit approval, send quote
    - Rules: margin threshold and credit terms require approval
  - Branding and personalization approval
    - Fields: logo file, artwork proof, engraving text, packaging option, approver, revision, approval status
    - Actions: preview, approve, request revision
  - Recipient import and dispatch
    - Fields: recipient file, name, contact, address/PIN, item, gift message, shipment group, delivery date
    - Actions: upload, validate, split shipments, track
    - Rules: validate format and addresses; preserve recipient privacy
  - Campaign completion report
    - Fields: corporate account, campaign/occasion, quantity ordered/delivered, on-time delivery, exceptions, spend, quote value, ROI inputs, renewal date
- Personalization production administration
  - Production queue
    - Fields: order/SKU, engraving text, recipient, packaging, artwork proof, stage, due date, lead time, QA status, exception
    - Actions: approve proof, start production, QA, pack, dispatch
    - Rules: QA failure blocks dispatch; track delay and packaging shortage
- Offers and promotion administration
  - Offer builder
    - Fields: name, type, discount type/value, minimum order, category/SKU, segment, coupon, usage limit, dates, combinability, approval status
    - Actions: create, preview, approve, schedule, pause, report
    - Rules: unique code; valid dates; margin guardrails for bullion; enforce per-customer usage
  - Offer performance
